

**AMERICAN
CONSERVATIVE
VALUES ETF**

Simply put, we seek to boycott as many companies hostile to conservative values as possible, without sacrificing performance.

STOP INVESTING IN THE LIBERAL AGENDA

Our belief is that we all either unwittingly or begrudgingly support the liberal agenda with our current investments which, disturbingly, may support:

Suppression of our first and second amendment rights, the liberal media, contributions to socialist candidates and causes and companies that are hostile to conservative values or proudly push the “woke” agenda.

INVESTMENT THESIS & PROCESS

The America Conservative Values ETF (ACVF) is based on the conviction that politically active companies fail to maximize their shareholders returns, as well as support issues and causes which conflict with our conservative ideals, beliefs, and values.

ACVF is an actively managed broadly diversified ETF endeavoring to balance performance, competitive with benchmarks such as the S&P 500 and Russell 1000, with the sense of purpose and advocacy of eliminating the worst-offending liberal companies from its portfolio.

WHERE DOES ACVF FIT IN YOUR PORTFOLIO

ACVF seeks to control risk to the S&P 500[®] and is designed to replace your current large-cap investments with an alternative you will be proud to own.

Align your Investing With Your Conservative Values

DISCLOSURE

An investment in the Fund is subject to risks, including the possible loss of the principal amount invested. Overall stock market risks may affect the value of individual securities in which the Fund invests. The Fund is actively managed, the Adviser's investment decisions impact the Fund's performance. The Fund and Adviser are new, the ETF has only recently commenced operations. This Fund may not be suitable for all investors. The equity securities in which the Fund invest will generally be those of companies with large market capitalizations. Exchange-Traded Funds (ETFs) trade like stocks, are subject to investment risk, and will fluctuate in market value. Transactions in shares of ETFs will result in brokerage commissions, which will reduce returns. Unlike typical exchange-traded funds, there are no indexes that the Fund attempts to track or replicate. Thus, the ability of the Fund to achieve its objectives will depend on the effectiveness of the portfolio manager. There is no assurance that the investment process will consistently lead to successful investing. Favorability ratings may be collected from shareholders of the Fund, who may not be professional investors, and may have no financial expertise, and may not

any research on companies prior to participation (referred to herein as "Fund Investorsourced research and opinion." Fund Investorsourced research and opinion depends, to a large extent, on active participation of a sufficient number of shareholders. Investment decisions made using Shareholder Sourced Research may be influenced by cognitive and emotional biases, resulting in investment choices that underperform the market generally. The Fund is structured as an ETF and as a result, is subject to special risks. Shares are bought and sold at market price (closing price) not net asset value (NAV) and are not individually redeemed from the Fund. Market price returns are based on the midpoint of the bid/ask spread at 4:00pm Eastern Time (when NAV is normally determined) and do not represent the return you would receive if you traded at other times. "Market Price" is the current price at which shares are bought and sold. Market returns are based upon the last trade price. "NAV" is the dollar value of a single share, based on the value of the underlying assets of the fund minus its liabilities, divided by the number of shares outstanding. Calculated at the end of each business day."

Ridgeline Research, LLC serves as the investment advisor, and Vident Investment Advisory, LLC serves as the sub-advisor to the fund. The Fund is distributed by Foreside Fund Services, LLC, which is not affiliated with Ridgeline Research, LLC, Vident Investment Advisory, LLC, or any of their affiliates.

Footnotes: (1) Beta represents the systematic risk of a portfolio and measures its sensitivity to a benchmark. A beta of 1 implies that you can expect the movement of a fund's return series to match that of the benchmark used to measure beta. (2) 30-Day Median Bid/Ask Percentage Spread Calculation: (i) identifies the ETF's National Best Bid Offer (NBBO) as of the end of each 10-second interval during each trading day of the last 30 calendar days; (ii) divides the difference between each such bid and offer by the midpoint of the NBBO; and (iii) identifies the median of those values. (3) 30 Day Average Premium/Discount Calculation: The average of closing premium/discount for each trading day of the last 30 calendar days. (4) Since Inception Returns are annualized and calculated using 10/28/20 NAV and Index Values. (5) The Global Industry Classification Standard (GICS).
