## FUND SUMMARY

### Investment Objective

The American Conservative Values ETF (the “Fund”) seeks to achieve long-term capital appreciation with capital preservation as a secondary objective.

### Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. Investors purchasing shares on a national securities exchange, national securities association or over-the-counter trading system where shares may trade from time to time (each, a “Secondary Market”) may be subject to customary brokerage commissions charged by their broker that are not reflected in the table set forth below.

### Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

Management Fee <sup>(1)</sup> .....	0.75%
Distribution and/or Service (12b-1) Fees .....	None
Other Expenses .....	None
Total Annual Fund Operating Expenses .....	<u>0.75%</u>

(1) Under the Investment Advisory Agreement, Ridgeline Research LLC (the “Adviser”), at its own expense and without reimbursement from the Fund, pays all of the expenses of the Fund, excluding the advisory fees, distribution fees or expenses under a 12b-1 plan (if any), interest expenses, taxes, acquired fund fees and expenses, brokerage commissions and any other portfolio transaction related expenses and fees arising out of transactions effected on behalf of the Fund, credit facility fees and expenses, including interest expenses, and litigation and indemnification expenses and other extraordinary expenses not incurred in the ordinary course of the Fund’s business.

### Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<u>Name of Fund</u>	<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
American Conservative Values ETF .....	\$77	\$240	\$417	\$930

### Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual Fund operating expenses or in the example, affect the Fund’s performance. This rate excludes the value of portfolio securities received or delivered as a result of any in kind creations or redemptions of the Fund’s shares. During the most recent fiscal year ended July 31, 2022, the Fund’s portfolio turnover rate was 3.70% of the average value of the portfolio.

### Principal Investment Strategies

Under normal circumstances, the Fund seeks to meet its investment objective by investing in at least 80% of its net assets, plus borrowings for investment purposes, if any, in equity securities of U.S. companies that meet its politically conservative criteria (i.e., “conservative values”). The equity securities in which the Fund invests will generally be those of companies with large market capitalizations.

Large capitalization companies are those companies with market capitalizations similar to companies in the Russell 1000 Index or S&P 500 Index (the “Large Cap Indexes”). The size of the companies in the Large Cap Indexes changes with market conditions and the composition of the Indexes. The Adviser generally defines large cap as greater than \$4.0 Billion.

The Fund’s strategy reflects the Adviser’s conviction that politically active companies negatively impact their shareholders’ value by misallocating the company’s resources, as well as supporting issues and causes, which are opposed to conservative political beliefs and values. Representative examples of which are: belief in “American Exceptionalism,” individual liberty, and free enterprise. The misallocation of resources is a strong indication that the company’s managers are not solely focused on maximizing shareholder value. As such the Adviser believes such companies constitute poor long-term investment opportunities when compared to companies which focus solely on shareholder value and are consequently avoided.

The Fund is actively managed and seeks to avoid ownership of companies which the Adviser determines with the use of negative screening are perceived as hostile to conservative values resulting from having a negative reputation among politically conservative investors, business activities which alienate politically conservative customers and employees, and disproportionate support of liberal causes. Such support could be financial, as part of corporate

governance, marketing, business strategy or public activism, campaign contributions and advocacy by the company and or its senior management. Representative examples of a liberal causes include advocacy groups and campaigns that support Planned Parenthood, the Center for American Progress and the Courage to Change PAC.

Given the qualitative and quantitative analysis required to determine a company's alignment with conservative values, the Adviser has considerable discretion regarding the selection of securities which will achieve the Fund's investment objective.

Companies are continually evaluated by the Adviser for portfolio exclusion or inclusion based on financial reporting and data sources, such as, but not limited to: press releases, social media, advertising, lobbying efforts, data from Federal and State Election Commissions, market research, surveys, polling, as well as Fund Investor sourced research and opinion. Fund Investor sourced research and opinion is captured through a proprietary web-based advocacy platform that allows the Fund's investors to nominate companies for portfolio exclusion or inclusion. Representative examples of these data sources are political contributions as reported by the Federal Election Commission (FEC), jointly signed letters by corporate executives of a political nature, retail investor polling of company favorably. Nominations will take place at least quarterly. These nominations are one of several data sources considered by the Adviser in the Fund's security selection process. The Adviser is not bound by the results and the Adviser will not use "Fund Investor sourced research and opinion" for all investment decisions.

The Fund will generally hold the common stock of 200 to 500 companies with large market capitalizations. The Fund's portfolio is expected to be broadly diversified with exposure to growth and value as well as to all economic sectors. The Fund seeks to manage active risk to capitalization-weighted benchmarks such as the Russell 1000 and S&P 500. The Fund relies on the investment discretion of its Adviser with respect to the selection and management of its portfolio of investments. The Fund may engage in active and frequent trading of portfolio securities. Companies screened out of the Fund's portfolio for non-alignment with conservative values are disclosed daily on the Fund's public website.

The Fund's investment objective is a non-fundamental policy and may be changed by the Board of Trustees without shareholder approval upon 60 days' written notice to shareholders. The Fund is actively managed and does not seek to replicate an index.

Principal Risks

As with all funds, a shareholder is subject to the risk that his or her investment could lose money. The principal risks affecting shareholders' investments in the Fund are set forth below. An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation ("FDIC") or any government agency.

*ETF Structure Risks.* The Fund is structured as an ETF and as a result is subject to special risks, including:

- *Not Individually Redeemable.* Shares of the Fund ("Shares") are not individually redeemable and may be redeemed by the Fund at net asset value ("NAV") only in large blocks known as "Creation Units." You may incur brokerage costs purchasing enough Shares to constitute a Creation Unit.
- *Trading Issues.* Although it is expected that Shares will remain listed for trading on NYSE Arca, Inc. (the "Exchange"), trading in Shares on the Exchange may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable, such as extraordinary market volatility. There can be no assurance that Shares will continue to meet the listing requirements of the Exchange or will trade with any volume. There is no guarantee that an active secondary market will develop for Shares of the Fund. In stressed market conditions, the liquidity of Shares of the Fund may begin to mirror the liquidity of the Fund's underlying portfolio holdings, which can be significantly less liquid than Shares of the Fund. This adverse effect on liquidity for the Fund's Shares in turn could lead to differences between the market price of the Fund's Shares and the underlying value of those Shares.
- *Market Price Variance Risk.* The market prices of Shares will fluctuate in response to changes in NAV and supply and demand for Shares and will include a "bid-ask spread" charged by the exchange specialists, market makers or other participants that trade the particular security. There may be times when the market price and the NAV vary significantly. This means that Shares may trade at a discount to NAV. The market price of Shares may deviate from the value of the Fund's underlying portfolio holdings, particularly in times of market stress, with the result that investors may pay significantly more or receive significantly less than the underlying value of the Shares of the Fund bought or sold.

- *Authorized Participants (“APs”), Market Makers, and Liquidity Providers Concentration Risk.* The Fund has a limited number of financial institutions that may act as APs. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares of the Fund may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.
- *Costs of Buying or Selling Shares: Shares of the Fund.* Due to the costs of buying or selling Shares of the Fund, including brokerage commissions imposed by brokers and bid/ask spreads, frequent trading of Shares of the Fund may significantly reduce investment results and an investment in shares of the Fund may not be advisable for investors who anticipate regularly making small investments.

*Active Management Risk.* The Adviser’s investment decisions about individual securities impact the Fund’s ability to achieve its investment objective. The Adviser’s judgments about the attractiveness and potential appreciation of particular investments in which the Fund invests may prove to be incorrect and there is no guarantee that the Adviser’s investment strategy will produce the desired results.

*Fund Investor Sourced Research and Opinion Risk.* Company favorability ratings are collected from shareholders of the Fund, who may not be professional investors, may have no financial expertise, and may not do any research on companies prior to participation (referred to herein as “Fund Investor sourced research and opinion.” Fund Investor sourced research and opinion depends, to a large extent, on active participation of a sufficient number of shareholders. Investment decisions made using Shareholder Sourced Research may be influenced by cognitive and emotional biases, resulting in investment choices that underperform the market generally. Although the Adviser employs measures to detect irregularities in Fund Investor sourced research and opinion, there is no assurance these measures will be successful and, as a result, the integrity of the data could be compromised or could be subject to manipulation.

The Adviser may be unable to collect Fund Investor sourced research and opinion for a period of time because of technical issues, failures of the Internet, cybersecurity breaches, or adverse claims on intellectual property, among other reasons.

*Market Risk.* Overall stock market risks may affect the value of individual securities in which the Fund invests. Factors such as domestic economic growth and market conditions, interest rate levels, and political events affect the securities markets. When the value of the Fund's investments goes down, your investment in the Fund decreases in value and you could lose money.

*Large Capitalization Securities Risk.* Investments in large capitalization securities as a group could fall out of favor with the market, causing the Fund to underperform investments that focus on small capitalization securities. Larger, more established companies may be slow to respond to challenges and may grow more slowly than smaller companies.

*Equity Market Risk.* The equity securities held in the Fund's portfolio may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors that affect securities markets generally or factors affecting specific industries, sectors or companies in which the Fund invests. Common stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change.

*Non-Financial Risk.* Because the Fund assigns weights to securities of issuers for nonfinancial reasons, the Fund may underperform the broader equity market or other funds that do not take into consideration such non-financial factors when selecting investments.

*Portfolio Turnover Risk.* Portfolio turnover refers to the rate at which the securities held by the Fund are replaced. The higher the rate, the higher the transactional and brokerage costs associated with the turnover, which may reduce the Fund's return unless the securities traded can be bought and sold without corresponding commission costs. Active trading of securities may also increase the Fund's realized capital gains or losses, which may affect the taxes you pay as the Fund shareholder.

*Market Turbulence Resulting From COVID-19.* An outbreak of an infectious respiratory illness caused by a novel coronavirus known as COVID-19 has negatively affected the worldwide economy, as well as the economies of individual countries, the financial health of individual companies and the market in general in significant and unforeseen ways. The future impact of COVID-19 is

# AMERICAN CONSERVATIVE VALUES ETF

## Fund Summary - continued

currently unknown, and it may exacerbate other risks that apply to the Fund. Any such impact could adversely affect the Fund's performance, the performance of the securities in which the Fund invests and may lead to losses on your investment in the Fund.

*Cyber Security Risk.* Failures or breaches of the electronic systems of the Adviser and the Fund's other service providers, market makers, Authorized Participants (participants authorized to redeem Creation Units of a particular ETF) or the issuers of securities in which the Fund invests have the ability to cause disruptions and negatively impact the Fund's business operations, potentially resulting in financial losses to the Fund and its shareholders. While the Fund has established business continuity plans and risk management systems seeking to address system breaches or failures, there are inherent limitations in such plans and systems. Furthermore, the Fund cannot control the cyber security plans and systems of the Fund's service providers, market makers, Authorized Participants or issuers of securities in which the Fund invests.

*Operational Risk.* The Fund is exposed to operational risk arising from a number of factors, including but not limited to human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third parties, failed or inadequate processes and technology or systems failures. The Fund and the Adviser seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate for those risks that they are intended to address.

### Performance History

The bar chart and table below provide some indication of the risks of investing in the American Conservative Values Fund by showing changes in the Fund's performance from year to year and by showing the Fund's average annual returns for certain time periods as compared to a broad measure of market performance. Investors should be aware that past performance before and after taxes is not necessarily an indication of how the Fund will perform in the future.

Updated performance information is available by calling toll-free (888) 909-6030.

Annual Total Returns (calendar years ended 12/31)

2021 . . . . . 28.95

During the periods shown, the highest quarterly return was 11.72% (quarter ended 12/31/2021) and the lowest quarterly return was 0.21% (quarter ended 9/30/2021).

## AMERICAN CONSERVATIVE VALUES ETF

### Fund Summary - continued

The year to date return as of September 30, 2022 was -23.75%.

Average Annual Returns for Periods Ended December 31, 2021

	One Year	Since Inception <sup>(1)</sup>
Return Before Taxes	28.95%	40.16%
Return After-Taxes on Distributions	28.75%	39.91%
Return After-Taxes on Distributions and Sale of Fund Shares	17.26%	30.78%
S&P 500 Index (reflects no deduction for fees, expenses or taxes)	28.71%	39.80%

(1) The Fund commenced operations on October 28, 2020.

#### Investment Adviser and Sub-Adviser

Ridgeline Research LLC (the “Adviser”) is the investment adviser to the Fund.

Vident Investment Advisory, LLC (“VIA” or the “Trading Sub-Adviser”) is the trading sub-adviser to the Fund.

#### Portfolio Managers

*Adviser’s Portfolio Manager:* Tom Carter, President of the Adviser, has served as the Fund’s portfolio manager since its inception in October 2020.

*Trading Sub-Adviser’s Portfolio Managers:* Rafael Zayas, CFA, Head of Portfolio Management & Trading of VIA, and Austin Wen, CFA, Portfolio Manager of VIA, have been portfolio managers of the Fund since its inception in October 2020.

#### Purchase and Sale of Fund Shares

The Fund will issue (or redeem) Shares to certain institutional investors (typically market makers or other broker-dealers) only in large blocks of at least 25,000 Shares known as “Creation Units.” Creation Unit transactions are typically conducted in exchange for the deposit or delivery of in-kind securities and/or cash. Individual Shares may only be purchased and sold on a national securities exchange through a broker-dealer. You can purchase and sell individual Shares of the Fund throughout the trading day like any publicly traded security. The Fund’s Shares are listed on the Exchange (i.e., NYSE Arca, Inc). The price of the Fund’s Shares is based on market price, and because exchange-traded fund shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (premium) or less than NAV (discount). Except when aggregated in Creation Units, the Fund’s Shares are not redeemable securities.

Tax Information

The Fund's distributions will be taxed as ordinary income or capital gain, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account in which case withdrawals will be taxed.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund Shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other financial intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

## FUND SUMMARY

### Investment Objective

The American Conservative Values Small-Cap ETF (the “Fund”) seeks to achieve long-term capital appreciation with capital preservation as a secondary objective.

### Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. Investors purchasing shares on a national securities exchange, national securities association or over-the-counter trading system where shares may trade from time to time (each, a “Secondary Market”) may be subject to customary brokerage commissions charged by their broker that are not reflected in the table set forth below.

#### Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

Management Fee <sup>(1)</sup> .....	0.75%
Distribution and/or Service (12b-1) Fees .....	None
Other Expenses .....	None
Total Annual Fund Operating Expenses .....	<u>0.75%</u>

(1) Under the Investment Advisory Agreement, Ridgeline Research LLC (the “Adviser”) at its own expense and without reimbursement from the Trust, pays all of the expenses of the Fund, excluding the advisory fees, distribution fees or expenses under a 12b-1 plan (if any), interest expenses, taxes, acquired fund fees and expenses, brokerage commissions and any other portfolio transaction related expenses and fees arising out of transactions effected on behalf of the Fund, credit facility fees and expenses, including interest expenses, and litigation and indemnification expenses and other extraordinary expenses not incurred in the ordinary course of the Fund’s business.

### Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<u>Fund Name</u>	<u>1 Year</u>	<u>3 Years</u>
American Conservative Values Small-Cap ETF .....	\$77	\$240

### Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual Fund operating expenses or in the example, affect the Fund’s performance. This rate excludes the value of portfolio securities received or delivered as a result of any in kind creations or redemptions of the Fund’s Shares. As of the date of this Prospectus, the Fund has not yet commenced operations and therefore does not have any portfolio information available.

### Principal Investment Strategies

Under normal circumstances, the Fund seeks to meet its investment objective by investing at least 80% of its net assets, plus borrowings for investment purposes, if any, in equity securities of U.S. companies with small market capitalizations that meet its politically conservative criteria (i.e., “conservative values”).

Small capitalization companies are those companies with market capitalizations similar to companies in the Russell 2000 Index and S&P 600 Index (the “Small Cap Indexes”). The size of the companies in the Small Cap Indexes changes with market conditions and the composition of the Small Cap Indexes. The Adviser generally defines small cap as less than \$4.0 Billion and greater than \$500 million.

The Fund’s strategy reflects the Adviser’s conviction that politically active companies negatively impact their shareholders’ value by misallocating the company’s resources, as well as supporting issues and causes, which are opposed to conservative political beliefs and values. Representative examples of which are: belief in “American Exceptionalism,” individual liberty, and free enterprise. The misallocation of resources is a strong indication that the company’s managers are not solely focused on maximizing shareholder value. As such the Adviser believes such companies constitute poor long-term investment opportunities when compared to companies which focus solely on shareholder value and are consequently avoided.

The Fund is actively managed and seeks to avoid ownership of companies which the Adviser determines with the use of negative screening are perceived as hostile to conservative values resulting from having a negative reputation among politically conservative investors, business activities which alienate politically conservative customers and employees, and disproportionate

support of liberal causes. Such support could be financial, as part of corporate governance, marketing, business strategy or public activism, campaign contributions and advocacy by the company and or its senior management. Representative examples of a liberal causes include advocacy groups and campaigns that support Planned Parenthood, the Center for American Progress and the Courage to Change PAC.

Given the qualitative and quantitative analysis required to determine a company's alignment with conservative values, the Adviser has considerable discretion regarding the selection of securities which will achieve the Fund's investment objective.

Companies are continually evaluated by the Adviser for portfolio exclusion or inclusion based on financial reporting and data sources, such as, but not limited to: press releases, social media, advertising, lobbying efforts, data from Federal and State Election Commissions, market research, surveys, polling, as well as Fund Investor sourced research and opinion. Fund Investor sourced research and opinion is captured through a proprietary web-based advocacy platform that allows the Fund's investors to nominate companies for portfolio exclusion or inclusion. Representative examples of these data sources are political contributions as reported by the Federal Election Commission (FEC), jointly signed letters by corporate executives of a political nature, retail investor polling of company favorably. Nominations will take place at least quarterly. These nominations are one of several data sources considered by the Adviser in the Fund's security selection process. The Adviser is not bound by the results and the Adviser will not use "Fund Investor sourced research and opinion" for all investment decisions.

The Fund will generally hold the common stock of 400 to 600 companies with small market capitalizations. The Fund's portfolio is expected to be broadly diversified with exposure to growth and value as well as to all economic sectors. The Fund seeks to manage active risk to capitalization-weighted benchmarks such as the Russell 2000 and S&P 600 indices. The Fund relies on the investment discretion of its Adviser with respect to the selection and management of its portfolio of investments. The Fund may engage in active and frequent trading of portfolio securities. Companies screened out of the Fund's portfolio for non-alignment with conservative values are disclosed daily on the Fund's public website.

The Fund's investment objective is a non-fundamental policy and may be changed by the Board of Trustees without shareholder approval upon 60 days' written notice to shareholders. The Fund is actively managed and does not seek to replicate an index.

### Principal Risks

As with all funds, a shareholder is subject to the risk that his or her investment could lose money. The principal risks affecting shareholders' investments in the Fund are set forth below. An investment in the Fund is not a bank deposit and is not insured or guaranteed by the FDIC or any government agency.

ETF Structure Risks. The Fund is structured as an ETF and as a result is subject to special risks, including:

- *Not Individually Redeemable.* Shares of the Fund ("Shares") are not individually redeemable and may be redeemed by the Fund at NAV only in large blocks known as "Creation Units." You may incur brokerage costs purchasing enough Shares to constitute a Creation Unit.
- *Trading Issues.* Although it is expected that Shares will remain listed for trading on NYSE Arca, Inc. (the "Exchange"), trading in Shares on the Exchange may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable, such as extraordinary market volatility. There can be no assurance that Shares will continue to meet the listing requirements of the Exchange or will trade with any volume. There is no guarantee that an active secondary market will develop for Shares of the Fund. In stressed market conditions, the liquidity of Shares of the Fund may begin to mirror the liquidity of the Fund's underlying portfolio holdings, which can be significantly less liquid than Shares of the Fund. This adverse effect on liquidity for the Fund's Shares in turn could lead to differences between the market price of the Fund's Shares and the underlying value of those Shares.
- *Market Price Variance Risk.* The market prices of Shares will fluctuate in response to changes in NAV and supply and demand for Shares and will include a "bid-ask spread" charged by the exchange specialists, market makers or other participants that trade the particular security. There may be times when the market price and the NAV vary significantly. This means that Shares may trade at a discount to NAV. The market price of Shares may deviate from the value of the Fund's underlying portfolio holdings, particularly in times of market stress, with the result that investors may pay significantly more or receive significantly less than the underlying value of the Shares of the Fund bought or sold.

- *Authorized Participants (“APs”), Market Makers, and Liquidity Providers Concentration Risk.* The Fund has a limited number of financial institutions that may act as APs. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares of the Fund may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.
- *Costs of Buying or Selling Shares: Shares of the Fund.* Due to the costs of buying or selling Shares of the Fund, including brokerage commissions imposed by brokers and bid/ask spreads, frequent trading of Shares of the Fund may significantly reduce investment results and an investment in Shares of the Fund may not be advisable for investors who anticipate regularly making small investments.

*Active Management Risk.* The Adviser’s investment decisions about individual securities impact the Fund’s ability to achieve its investment objective. The Adviser’s judgments about the attractiveness and potential appreciation of particular investments in which the Fund invests may prove to be incorrect and there is no guarantee that the Adviser’s investment strategy will produce the desired results.

*Fund Investor Sourced Research and Opinion Risk.* Company favorability ratings are collected from shareholders of the Fund, who may not be professional investors, may have no financial expertise, and may not do any research on companies prior to participation (referred to herein as “Fund Investor sourced research and opinion.” Fund Investor sourced research and opinion depends, to a large extent, on active participation of a sufficient number of shareholders. Investment decisions made using Shareholder Sourced Research may be influenced by cognitive and emotional biases, resulting in investment choices that underperform the market generally. Although the Adviser employs measures to detect irregularities in Fund Investor sourced research and opinion, there is no assurance these measures will be successful and, as a result, the integrity of the data could be compromised or could be subject to manipulation. The Adviser may be unable to collect Fund Investor sourced research and opinion for a period of time because of technical issues, failures of the Internet, cybersecurity breaches, or adverse claims on intellectual property, among other reasons.

*Market Risk.* Overall stock market risks may affect the value of individual securities in which the Fund invests. Factors such as domestic economic growth and market conditions, interest rate levels, and political events affect the securities markets. When the value of the Fund's investments goes down, your investment in the Fund decreases in value and you could lose money.

*Equity Market Risk.* The equity securities held in the Fund's portfolio may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors that affect securities markets generally or factors affecting specific industries, sectors or companies in which the Fund invests. Common stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change.

*Non-Financial Risk.* Because the Fund assigns weights to securities of issuers for nonfinancial reasons, the Fund may underperform the broader equity market or other funds that do not take into consideration such non-financial factors when selecting investments.

*Portfolio Turnover Risk.* Portfolio turnover refers to the rate at which the securities held by the Fund are replaced. The higher the rate, the higher the transactional and brokerage costs associated with the turnover, which may reduce the Fund's return unless the securities traded can be bought and sold without corresponding commission costs. Active trading of securities may also increase the Fund's realized capital gains or losses, which may affect the taxes you pay as the Fund shareholder.

*Small Capitalization Stock Risk.* The value of a small capitalization company stocks or ETFs that invests in stocks of small capitalization companies may be subject to more abrupt or erratic market movements than those of larger, more established companies or the market averages in general.

*Market Turbulence Resulting From COVID-19.* An outbreak of an infectious respiratory illness caused by a novel coronavirus known as COVID-19 has negatively affected the worldwide economy, as well as the economies of individual countries, the financial health of individual companies and the market in general in significant and unforeseen ways. The future impact of COVID-19 is currently unknown, and it may exacerbate other risks that apply to the Fund. Any such impact could adversely affect the Fund's performance, the performance of the securities in which the Fund invests and may lead to losses on your investment in the Fund.

*Cyber Security Risk.* Failures or breaches of the electronic systems of the Adviser and the Fund's other service providers, market makers, Authorized Participants (participants authorized to redeem Creation Units of a particular ETF) or the issuers of securities in which the Fund invests have the ability to cause disruptions and negatively impact the Fund's business operations, potentially resulting in financial losses to the Fund and its shareholders. While the Fund has established business continuity plans and risk management systems seeking to address system breaches or failures, there are inherent limitations in such plans and systems. Furthermore, the Fund cannot control the cyber security plans and systems of the Fund's service providers, market makers, Authorized Participants or issuers of securities in which the Fund invests.

*Operational Risk.* The Fund is exposed to operational risk arising from a number of factors, including but not limited to human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or systems failures. The Fund and the Adviser seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate for those risks that they are intended to address.

#### Performance History

The Fund has not commenced operations. In the future, performance information will be presented in this section of the Prospectus. Performance information will contain a bar chart and table that provide some indication of the risks of investing in the Fund by showing changes in the Fund's performance from year to year and by showing the Fund's average annual returns for certain time periods as compared to a broad measure of market performance. Investors should be aware that past performance before and after taxes is not necessarily an indication of how the Fund will perform in the future.

Updated performance information is available by calling toll-free (888) 909-6030.

#### Investment Adviser and Sub-Adviser

Ridgeline Research LLC (the "Adviser") is the investment adviser to the Fund.

Vident Investment Advisory, LLC is the trading sub-adviser ("Trading Sub-Adviser") to the Fund.

### Portfolio Managers

Adviser's Portfolio Manager: Tom Carter, President of the Adviser, has served as the Fund's portfolio manager since its inception in 2020.

Trading Sub-Adviser's Portfolio Managers: Rafael Zayas, CFA, Head of Portfolio Management of VIA, and Austin Wen, CFA, Portfolio Manager of VIA, have been portfolio managers of the Fund since its inception.

### Purchase and Sale of Fund Shares

The Fund will issue (or redeem) Shares to certain institutional investors (typically market makers or other broker-dealers) only in large blocks of at least 25,000 Shares known as "Creation Units." Creation Unit transactions are typically conducted in exchange for the deposit or delivery of in-kind securities and/or cash. Individual Shares may only be purchased and sold on a national securities exchange through a broker-dealer. You can purchase and sell individual Shares of the Fund throughout the trading day like any publicly traded security. The Fund's Shares are listed on the Exchange (i.e., NYSE Arca, Inc.). The price of the Fund's Shares is based on market price, and because exchange-traded fund shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (premium) or less than NAV (discount). Except when aggregated in Creation Units, the Fund's Shares are not redeemable securities.

### Tax Information

The Fund's distributions will be taxed as ordinary income or capital gain, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account in which case withdrawals will be taxed.

### Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund Shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other financial intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

## **AMERICAN CONSERVATIVE VALUES ETFS**

---

### **Additional Information About the Funds' Investments**

The Funds' investment objectives are as follows:

- The American Conservative Values ETF seeks to achieve long-term capital appreciation with capital preservation as a secondary objective.
- The American Conservative Values Small-Cap ETF seeks to achieve long-term capital appreciation with capital preservation as a secondary objective.

Each Fund's investment objective may be changed by the Board of Trustees without shareholder approval upon 60 days' written notice to shareholders.

In the remaining portion of this prospectus, each of the above-mentioned ETFs may be referred to generally as a "Fund" or collectively, as the "Funds".

#### **Principal Investment Strategies**

Under normal circumstances, the American Conservative Values ETF seeks to meet its investment objective by investing at least 80% of its net assets, plus borrowings for investment purposes, if any, in equity securities of U.S. companies that meet its politically conservative criteria (i.e., "conservative values"). The foregoing 80% investment policy may be changed on 60 days' notice to shareholders. The equity securities in which the Fund invest will generally be those of companies with large market capitalizations.

With respect to American Conservative Values ETF, large capitalization companies are those companies with market capitalizations similar to companies in the Large Cap Indexes. The size of the companies in the Large Cap Indexes changes with market conditions and the composition of the Large Cap Indexes. The Adviser generally defines large cap as greater than \$4.0 Billion. The American Conservative Value ETF will generally hold 200-500 large capitalization companies weighted by their market capitalization. The portfolio will be broadly diversified with exposure to growth and value companies as well as exposure to all economic sectors.

Under normal circumstances, the American Conservative Values Small-Cap ETF seeks to meet its investment objective by investing at least 80% of its net assets, plus borrowings for investment purposes, if any, in equity securities of U.S. companies with small market capitalizations that meet its politically conservative criteria (i.e., "conservative values"). The foregoing 80% investment policy may be changed on 60 days' notice to shareholders.

## AMERICAN CONSERVATIVE VALUES ETFS

### Additional Information About the Funds' Investments - continued

---

With respect to American Conservative Values Small-Cap ETF, small capitalization companies are those companies with market capitalizations similar to companies in the Small Cap Indexes. The size of the companies in the Small Cap Indexes changes with market conditions and the composition of the Small Cap Indexes. The Adviser generally defines small cap as less than \$4.0 Billion and greater than \$500 million. The American Conservative Values Small-Cap ETF will generally hold 400-600 small capitalization companies weighted by their market capitalization. The portfolio will be broadly diversified with exposure to growth and value companies as well as exposure to all economic sectors.

Each Fund will seek to avoid ownership of companies which are not aligned with politically conservative community standards. These standards are collectively qualitative and are unmeasurable; encompassing ever evolving perceptions of ethical, moral, and ideological behavior. The determination of which companies to avoid will be continually evaluated by the Adviser using internal and external research, as well as Fund Investor sourced research and opinion using a web-based interface as well as market research and surveys. The companies being avoided will be displayed and updated daily on the Funds' website. The final determination on which companies to exclude from the Funds is qualitative and made by the Adviser.

Each Fund reserves the right to invest in U.S. government securities, money market instruments, and cash, without limitation, as determined by the Adviser in response to adverse market, economic, political, or other conditions. Each Fund also may "hedge" or minimize its exposure to one or more foreign currencies in response to such conditions. In the event that a Fund engages in temporary defensive strategies that are inconsistent with its investment strategies, such Fund's ability to achieve its investment objective may be limited.

Each Fund is actively managed and does not seek to replicate an index.

It is important that you closely review and understand the risks of investing in each Fund. References herein to “the Fund” are to any one of the Funds generally. The Fund’s NAV and investment return will fluctuate based upon changes in the value of its portfolio securities. You could lose money on your investment in the Fund, and the Fund could underperform other investments. There is no guarantee that the Fund will meet its investment objective. An investment in the Fund is not a deposit of a bank and is not insured or guaranteed by the FDIC or any other government agency. Below are some of the specific risks of investing in the Fund.

#### All Funds.

*ETF Structure Risks.* The Funds are structured as ETFs and as a result are subject to special risks, including:

- *Not Individually Redeemable.* Shares of the Funds are not individually redeemable and may be redeemed by the Funds at NAV only in large blocks known as “Creation Units.” You may incur brokerage costs purchasing enough Shares to constitute a Creation Unit.
- *Trading Issues.* Trading in Shares on the Exchange may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable, such as extraordinary market volatility. There can be no assurance that Shares will continue to meet the listing requirements of the Exchange or will trade with any volume. There is no guarantee that an active secondary market will develop for Shares of the Funds. In stressed market conditions, the liquidity of Shares of the Funds may begin to mirror the liquidity of the Funds’ underlying portfolio holdings, which can be significantly less liquid than Shares of the Funds.
- *Market Price Variance Risk.* The market prices of Shares will fluctuate in response to changes in NAV and supply and demand for Shares and will include a “bid-ask spread” charged by the exchange specialists, market makers or other participants that trade the particular security. There may be times when the market price and the NAV vary significantly. This means that Shares may trade at a discount to NAV.
- *Authorized Participants (“APs”), Market Makers, and Liquidity Providers Concentration Risk.* The Funds have a limited number of financial institutions that may act as APs. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares of the Funds

may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.

*Costs of Buying or Selling Shares of the Funds.* Due to the costs of buying or selling Shares of the Funds, including brokerage commissions imposed by brokers and bid/ask spreads, frequent trading of Shares of the Funds may significantly reduce investment results and an investment in Shares of the Funds may not be advisable for investors who anticipate regularly making small investments.

*Active Management Risk.* The Adviser's investment decisions about individual securities impact the Funds' ability to achieve their investment objectives. The Adviser's judgments about the attractiveness and potential appreciation of particular investments in which the Funds invest may prove to be incorrect and there is no guarantee that the Adviser's investment strategy will produce the desired results.

*Fund Investor Sourced Research and Opinion Risk.* Company favorability ratings are collected from shareholders of the Fund, who may not be professional investors, may have no financial expertise, and may not do any research on companies prior to participation (referred to herein as "Fund Investor sourced research and opinion." Fund Investor sourced research and opinion depends, to a large extent, on active participation of a sufficient number of shareholders. Investment decisions made using Shareholder Sourced Research may be influenced by cognitive and emotional biases, resulting in investment choices that underperform the market generally. Although the Adviser employs measures to detect irregularities in Fund Investor sourced research and opinion, there is no assurance these measures will be successful and, as a result, the integrity of the data could be compromised or could be subject to manipulation. The Adviser may be unable to collect Fund Investor sourced research and opinion for a period of time because of technical issues, failures of the Internet, cybersecurity breaches, or adverse claims on intellectual property, among other reasons.

*Non-Financial Risk.* Each Fund selects and assigns weights to securities of issuers for nonfinancial reasons; therefore, either Fund may underperform the broader equity market or other funds that do not utilize criteria when selecting investments. Although the Funds are designed to be comprised of a portfolio of companies with certain qualitative characteristics criteria,

there is no assurance that a Fund will be comprised of such securities or that companies that have historically exhibited such characteristics will continue to exhibit such characteristics in the future. The Funds relies on various sources of information regarding an issuer, including information that may be based on assumptions and estimates. Neither of the Funds can offer assurances that the methodologies or sources of information will provide an accurate assessment of the issuers of the securities included in each Fund's portfolio. The third-party sources of information relied upon by the Funds may change their criteria for the characterizing issuers from time to time and companies characterized as having conservative values may not exhibit such characteristics.

*Equity Market Risk.* The equity securities held in the Funds' portfolios may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors that affect securities markets generally or factors affecting specific industries, sectors or companies in which the Funds invest. Common stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change.

*Operational Risk.* The Funds are exposed to operational risk arising from a number of factors, including but not limited to human error, processing and communication errors, errors of the Funds' service providers, counterparties or other third parties, failed or inadequate processes and technology or systems failures. The Funds and the Adviser seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate for those risks that they are intended to address.

*Shareholder Activism Risk.* The Adviser, on behalf of the Funds, may engage in shareholder activist activities with respect to the portfolio securities held by a Fund. These activities may include, but are not limited to, engaging in a dialog with management of the companies held by a Fund, organizing with other investors in the company, or making proposals on the company's proxy statements. The Adviser believes that engaging in these activities may encourage management to make changes to its practices that could increase long-term shareholder value.

Engaging in such activities may involve risks not normally associated with an investment in an exchange-traded fund. For example, this activity may require the Adviser to negotiate with management and other third parties, which may require negotiating skills, strategic planning, and judgments on the part of the Adviser about legal, regulatory, political, public relations and other non-financial

matters that are not normally required for an investment adviser to an exchange-traded fund. These activities could also detract from the Adviser's focus on identifying other attractive investment opportunities for the Funds. There can be no guarantee that the Adviser will make the correct judgments necessary to achieve the Funds' objectives or that the Adviser will be successful in effecting changes in management's practices. In addition, there are also the risks that management may not effect changes sought by the Fund, or that the Fund may succeed in making positive changes, but they are not recognized by the market and do not result in long-term shareholder value.

Engaging in these activities may also result in the company or other parties, including regulators having jurisdiction over the Funds, taking legal action against the Funds. This could result in a Fund incurring legal fees to defend itself and could result in the Fund being liable to the target for damages. These costs would be borne by the Fund and could significantly increase the Fund's expenses.

#### American Conservative Values ETF.

*Large Capitalization Securities Risk.* Investments in large capitalization securities as a group could fall out of favor with the market, causing the Fund to underperform investments that focus on small capitalization securities. Larger, more established companies may be slow to respond to challenges and may grow more slowly than smaller companies.

#### American Conservative Values Small-Cap ETF.

*Small Capitalization Stock Risk.* The value of a small capitalization company stocks or ETFs that invests in stocks of small capitalization companies may be subject to more abrupt or erratic market movements than those of larger, more established companies or the market averages in general.

#### Non-Principal Risks for All Funds

*Dividend-Paying Securities Risk.* To the extent the Funds invest in dividend-paying securities it will be subject to certain risks. The company issuing such securities may fail and have to decrease or eliminate its dividend. In such an event, a Fund may not only lose the dividend payout but the stock price of the company may fall.

*Volatility Risk.* Equity securities tend to be more volatile than other investment choices. The value of the Funds can be more volatile than the market as a whole. This volatility affects the value of the Funds' Shares.

*Foreign Securities Risk.* To the extent the Funds invest in foreign securities, they may be subject to additional risks not typically associated with investments in domestic securities. These risks may include, among others, currency risk, country risks (political, diplomatic, regional conflicts, terrorism, war, social and economic instability, currency devaluations and policies that have the effect of limiting or restricting foreign investment or the movement of assets), different trading practices, less government supervision, less publicly available information, limited trading markets and greater volatility.

*Emerging Markets Securities Risk.* To the extent that Funds invest in issuers located in emerging markets, the risk may be heightened by political changes, changes in taxation, or currency controls that could adversely affect the values of these investments. Emerging markets have been more volatile than the markets of developed countries with more mature economies.

*Cyber Security Risk.* Failures or breaches of the electronic systems of the Funds, the Adviser, and the Funds' other service providers, market makers, Authorized Participants or the issuers of securities in which the Funds invest have the ability to cause disruptions and negatively impact the Funds' business operations, potentially resulting in financial losses to the Funds and their shareholders. While the Funds have established business continuity plans and risk management systems seeking to address system breaches or failures, there are inherent limitations in such plans and systems. Furthermore, the Funds cannot control the cyber security plans and systems of the Funds' service providers, market makers, Authorized Participants or issuers of securities in which the Funds invest.

### **Temporary Investments**

To respond to adverse market, economic, political or other conditions, the Funds may invest 100% of their total assets, without limitation, in high-quality short-term debt securities. These short-term debt securities include: treasury bills, commercial paper, certificates of deposit, bankers' acceptances, U.S. Government securities and repurchase agreements. While the Funds are in a defensive position, the opportunity to achieve their respective investment objectives will be limited. The Funds may also invest a substantial portion of their respective assets in such instruments at any time to maintain liquidity or pending selection of investments in accordance with its policies. When the Funds take such a position, they may not achieve their investment objectives.

*The Investment Adviser.* Ridgeline Research LLC (the “Adviser”), 14961 Finegan Farm Drive, Darnestown, Maryland 20874, is the investment adviser to each Fund. The Adviser is registered as an investment adviser under the Investment Advisers Act of 1940, as amended. The Adviser is a limited liability company and was organized in Delaware. As of July 31, 2022, the Adviser had approximately \$32.5 in assets under management.

*The Trading Sub-Adviser.* The Adviser has retained the Trading Sub-Adviser to serve as trading sub-adviser for each Fund. VIA is responsible for the day-to-day management of the Funds. VIA, a registered investment adviser, is a wholly-owned subsidiary of Vident Financial, LLC. Its principal office is located at 1125 Sanctuary Parkway, Suite 515, Alpharetta, Georgia 30009. VIA was formed in 2014 and provides investment advisory services to ETFs, including the Funds. The Trading Sub-Adviser is responsible for trading portfolio securities for the Funds, including selecting broker-dealers to execute purchase and sale transactions or in connection with any rebalancing or reconstitution of the indexes, subject to the supervision of the Adviser and the Board. For its services, the Trading Sub-Adviser is paid fee by the Adviser, which fee is calculated daily and paid monthly, at an annual rate based on the average daily net assets of each Fund at the following rate: 0.05% on the first \$250 million in net assets; 0.04% on the next \$250 million in net assets; and 0.03% on any net assets in excess of \$500 million (subject to a minimum of \$30,000 per year).

Under the Investment Advisory Agreement between the Adviser and the Trust, on behalf of the Funds (the “Investment Advisory Agreement”), the Adviser has agreed to pay all expenses of each Fund, except for: the fee paid to the Adviser pursuant to the Investment Advisory Agreement, distribution fees or expenses under a 12b-1 plan (if any), interest expenses, taxes, acquired fund fees and expenses, brokerage commissions and any other portfolio transaction related expenses and fees arising out of transactions effected on behalf of the Fund, credit facility fees and expenses, including interest expenses, and litigation and indemnification expenses and other extraordinary expenses not incurred in the ordinary course of the Fund’s business. The Adviser also furnishes each Fund with office space and certain administrative services. For its services, the Adviser is entitled to receive an annual management fee calculated daily and payable monthly, as a percentage of each Fund’s average daily net assets at the rate of 0.75%. During the fiscal year ended July 31, 2022, the American Conservative Values Fund paid the Adviser 0.75% in management fees pursuant to the Investment Advisory Agreement.

A discussion regarding the basis for the Board of Trustees approving the Investment Advisory Agreement and Sub-Advisory Agreement for the Funds will be available in the Funds' semi-annual report to shareholders for the period ending January 31, 2023, once that report is produced.

### The Portfolio Managers

*Adviser Portfolio Manager* – Tom Carter is a co-portfolio manager of each Fund. Tom has almost 30 years of experience in the investment management industry and oversaw portfolio and index management for over 10 years.

*Trading Sub-Adviser Portfolio Managers* – The Funds are managed by VIA's portfolio management team. The individual members of the team responsible for the day to day management of each Fund's portfolio are listed below.

*Rafael Zayas*, CFA has over 15 years of trading and portfolio management experience in global equity products and ETFs. He joined VIA in 2017 and is SVP, Head of Portfolio Management and trading. He has specialized in – international equities, managing and trading of developed, emerging, and frontier market portfolios. Prior to joining VIA, he was a Portfolio Manager at Russell Investments for over \$5 billion in quantitative strategies across global markets, including emerging, developed and frontier markets and listed alternatives. Before that, he was an equity Portfolio Manager at BNY Mellon Asset Management, where he was responsible for \$150 million in internationally listed global equity ETFs and assisted in managing \$3 billion of global ETF assets. Mr. Zayas holds a BS in Electrical Engineering from Cornell University. He also holds the Chartered Financial Analyst designation.

*Austin Wen*, CFA has 8 years of investment management experience. He is a Portfolio Manager at VIA and has been with the firm since 2014, specializing in portfolio management and trading, of equity portfolios and commodities-based portfolios, as well as risk monitoring, and investment analysis. Previously, he was an analyst for Vident Financial, working on the development and review of investment solutions. He began his career as a State Examiner for the Georgia Department of Banking and Finance. Mr. Wen obtained a BA in Finance from the University of Georgia and holds the Chartered Financial Analyst designation.

The Funds' Statement of Additional Information (the "SAI") provides additional information about the portfolio manager's compensation, other accounts managed by the portfolio manager, and the portfolio managers' ownership in the Funds.

The Trust

The Funds are each series of the ETF Opportunities Trust, an open-end management investment company organized as a Delaware statutory trust on March 18, 2019. The Trustees supervise the operations of the Funds according to applicable state and federal law, and the Trustees are responsible for the overall management of the Funds' business affairs.

Portfolio Holdings

A description of the Funds' policies and procedures with respect to the disclosure of the Funds' portfolio securities is available in the Funds' SAI. Complete holdings are published on the Funds' website on a daily basis. Please visit the Funds' website at [www.INVESTCONSERVATIVE.com](http://www.INVESTCONSERVATIVE.com). In addition, the Funds' complete holdings (as of the dates of such reports) are available in reports on Form N-PORT and Form N-CSR filed with the Securities and Exchange Commission (the "SEC").

Shares of the Funds are listed for trading on the Exchange. Share prices are reported in dollars and cents per share. Shares can be bought and sold on the secondary market throughout the trading day like other publicly traded shares and Shares typically trade in blocks of less than a Creation Unit. There is no minimum investment required. Shares may only be purchased and sold on the secondary market when the Exchange is open for trading.

When buying or selling Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offered price in the secondary market on each leg of a round trip (purchase and sale) transaction.

Authorized Participants may acquire Shares directly from the Funds, and Authorized Participants may tender their Shares for redemption directly to the Funds, at NAV per share only in large blocks, or Creation Units, of at least 25,000 Shares. Purchases and redemptions directly with the Funds must follow each Fund's procedures, which are described in the SAI.

Under normal circumstances, a Fund will pay out redemption proceeds to a redeeming AP within one day after the AP's redemption request is received, in accordance with the process set forth in the Fund's SAI and in the agreement between the AP and the Fund's distributor. However, each Fund reserves the right, including under stressed market conditions, to take up to seven days after the receipt of a redemption request to pay an AP, all as permitted by the 1940 Act. The Funds anticipate regularly meeting redemption requests primarily through in-kind redemptions. However, the Funds reserve the right to pay redemption proceeds to an AP in cash. Cash used for redemptions will be raised from the sale of portfolio assets or may come from existing holdings of cash or cash equivalents.

The Funds may liquidate and terminate at any time without shareholder approval.

## **Share Trading Prices**

The approximate value of Shares, an amount representing on a per share basis the sum of the current market price of the securities accepted by the Funds in exchange for Shares and an estimated cash component will be disseminated every 15 seconds throughout the trading day through the facilities of the Consolidated Tape Association. This approximate value should not be viewed as a “real-time” update of the NAV per share because the approximate value may not be calculated in the same manner as the NAV, which is computed once a day, generally at the end of the business day. The Funds are not involved in, or responsible for, the calculation or dissemination of the approximate value of the Shares, and the Funds do not make any warranty as to the accuracy of these values.

## **Book Entry**

Shares are held in book entry form, which means that no stock certificates are issued. The Depository Trust Company (“DTC”) or its nominee is the record owner of all outstanding Shares and is recognized as the owner of all Shares for all purposes.

Investors owning Shares are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all Shares. Participants in DTC include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered in your name, and you are not considered a registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely upon the procedures of DTC and its participants. These procedures are the same as those that apply to any other securities that you hold in book entry or “street name” form.

Shares can only be purchased and redeemed directly from the Funds in Creation Units by Authorized Participants, and the vast majority of trading in Shares occurs on the secondary market. Because the secondary market trades do not directly involve the Funds, it is unlikely those trades would cause the harmful effects of market timing, including dilution, disruption of portfolio management, increases in the Funds' trading costs and the realization of capital gains. With regard to the purchase or redemption of Creation Units directly with the Funds, to the extent effected in-kind (i.e., for securities), those trades do not cause the harmful effects that may result from frequent cash trades. To the extent trades are effected in whole or in part in cash, those trades could result in dilution to the Funds and increased transaction costs, which could negatively impact a Fund's ability to achieve its investment objective. However, direct trading by Authorized Participants is critical to ensuring that Shares trade at or close to NAV. The Funds also employ fair valuation pricing to minimize potential dilution from market timing. In addition, the Funds impose transaction fees on purchases and redemptions of Shares to cover the custodial and other costs incurred by the Funds in effecting trades. These fees increase if an investor substitutes cash in part or in whole for securities, reflecting the fact that a Fund's trading costs increase in those circumstances. Given this structure, the Trust has determined that it is not necessary to adopt policies and procedures to detect and deter market timing of the Shares.

**Distribution and Service Plan**

The Funds have not adopted a distribution and service plan (“Plan”) pursuant to Rule 12b-1 under the 1940 Act. Under a Plan, the Funds would be authorized to pay distribution fees to the distributor and other firms that provide distribution and shareholder services.

No distribution or service fees are currently paid by the Funds and will not be paid by the Funds unless authorized by the Trust’s Board of Trustees through a Plan adopted by the Board. There are no current plans to impose these fees. In the event Rule 12b-1 fees were charged, over time they would increase the cost of an investment in the Funds.

**Payments to Financial Intermediaries**

The Adviser, out of its own resources and without additional cost to the Funds or its shareholders, may pay intermediaries for the sale or marketing of Fund shares and related services, including participation in activities that are designed to make intermediaries more knowledgeable about exchange traded products. Payments are generally made to intermediaries that provide shareholder servicing, marketing and related sales support, educational training or support, or access to sales meetings, sales representatives, and management representatives of the intermediary. Payments may also be made to intermediaries for making shares of the Funds available to their customers generally and in investment programs. The Adviser may also reimburse expenses or make payments from its own resources to intermediaries in consideration of services or other activities the Adviser believes may facilitate investment in the Funds. The possibility of receiving, or the receipt of, the payments described above may provide intermediaries or their salespersons with an incentive to favor sales of shares of the Funds, and other funds whose affiliates make similar compensation available, over other investments that do not make such payments. Investors may wish to take such payment arrangements into account when considering and evaluating any recommendations relating to the Funds and other ETFs.

Shares are traded throughout the day in the secondary market on a national securities exchange on an intra-day basis and are created and redeemed in-kind and/or for cash in Creation Units at each day's next calculated NAV. In-kind arrangements are designed to protect ongoing shareholders from the adverse effects on a Fund's portfolio that could arise from frequent cash redemption transactions. In a conventional mutual fund, redemptions can have an adverse tax impact on taxable shareholders if the mutual fund needs to sell portfolio securities to obtain cash to meet net fund redemptions. These sales may generate taxable gains for the ongoing shareholders of the mutual fund, whereas the Shares' in-kind redemption mechanism generally will not lead to a tax event for the Funds or its ongoing shareholders.

Ordinarily, dividends from net investment income, if any, are declared and paid quarterly by the Funds. The Funds distribute their net realized capital gains, if any, to shareholders annually. The Funds may also pay a special distribution at the end of a calendar year to comply with federal tax requirements.

No dividend reinvestment service is provided by the Funds. Broker-dealers may make available the DTC book-entry Dividend Reinvestment Service for use by beneficial owners of the Funds for reinvestment of their dividend distributions. Beneficial owners should contact their broker to determine the availability and costs of the service and the details of participation therein. Brokers may require beneficial owners to adhere to specific procedures and timetables. If this service is available and used, dividend distributions of both income and realized gains will be automatically reinvested in additional whole Shares of the Funds purchased in the secondary market.

Distributions in cash may be reinvested automatically in additional whole Shares only if the broker through whom you purchased Shares makes such option available.

### **Taxes**

As with any investment, you should consider how your investment in Shares will be taxed. The tax information in this Prospectus is provided as general information. You should consult your own tax professional about the tax consequences of an investment in Shares.

Unless your investment in Shares is made through a tax-exempt entity or tax-deferred retirement account, such as an individual retirement account, you need to be aware of the possible tax consequences when:

- A Fund makes distributions,
- You sell your Shares listed on the Exchange, and
- You purchase or redeem Creation Units.

### **Taxes on Distributions**

Distributions from each Fund's net investment income, including net short-term capital gains, if any, are taxable to you as ordinary income, except that each Fund's dividends attributable to its "qualified dividend income" (i.e., dividends received on stock of most domestic and certain foreign corporations with respect to which the Fund satisfies certain holding period and other restrictions), if any, generally are subject to federal income tax for non-corporate shareholders who satisfy those restrictions with respect to their Shares at the rate for net capital gain. A part of each Fund's dividends also may be eligible for the dividends-received deduction allowed to corporations -- the eligible portion may not exceed the aggregate dividends each Fund receives from domestic corporations subject to federal income tax (excluding REITs) and excludes dividends from foreign corporations -- subject to similar restrictions. However, dividends a corporate shareholder deducts pursuant to that deduction are subject indirectly to the federal alternative minimum tax. A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund Shares are held in a taxable account. These costs, which are not reflected in annual Fund operating expenses affect the Fund's performance

In general, your distributions are subject to federal income tax when they are paid, whether you take them in cash or reinvest them in the Funds (if that option is available). Distributions reinvested in additional Shares through the means of a dividend reinvestment service, if available, will be taxable to shareholders acquiring the additional Shares to the same extent as if such distributions had been received in cash. Distributions of net long-term capital gains, if any, in excess of net short-term capital losses are taxable as long-term capital gains, regardless of how long you have held the Shares.

Distributions in excess of a Fund's current and accumulated earnings and profits are treated as a tax-free return of capital to the extent of your basis in the Shares and as capital gain thereafter. A distribution will reduce a Fund's

NAV per share and may be taxable to you as ordinary income or capital gain (as described above) even though, from an investment standpoint, the distribution may constitute a return of capital.

By law, the Funds are required to withhold 28% of your distributions and redemption proceeds if you have not provided the Fund with a correct Social Security number or other taxpayer identification number and in certain other situations.

### **Taxes on Exchange-Listed Share Sales**

Any capital gain or loss realized upon a sale of Shares is generally treated as long-term capital gain or loss if the Shares have been held for more than one year and as short-term capital gain or loss if the Shares have been held for one year or less. The ability to deduct capital losses from sales of Shares may be limited.

### **Taxes on Purchase and Redemption of Creation Units**

An Authorized Participant who exchanges securities for Creation Units generally will recognize a gain or a loss equal to the difference between the market value of the Creation Units at the time of the exchange and the sum of the exchanger's aggregate basis in the securities surrendered plus any Cash Component it pays. An Authorized Participant who exchanges Creation Units for securities will generally recognize a gain or loss equal to the difference between the exchanger's basis in the Creation Units and the sum of the aggregate market value of the securities received plus any cash equal to the difference between the NAV of the Shares being redeemed and the value of the securities. The Internal Revenue Service ("Service"), however, may assert that a loss realized upon an exchange of securities for Creation Units cannot be deducted currently under the rules governing "wash sales" or for other reasons. Persons exchanging securities should consult their own tax advisor with respect to whether wash sale rules apply and when a loss might be deductible.

Any capital gain or loss realized upon redemption of Creation Units is generally treated as long-term capital gain or loss if the Shares have been held for more than one year and as short-term capital gain or loss if the Shares have been held for one year or less.

If you purchase or redeem Creation Units, you will be sent a confirmation statement showing how many Shares you purchased or sold and at what price. See "Tax Status" in the SAI for a description of the newly effective requirement regarding basis determination methods applicable to share redemptions and each Fund's obligation to report basis information to the Service.

## AMERICAN CONSERVATIVE VALUES ETFS

### Dividends, Other Distributions and Taxes - continued

*Possible Tax Law Changes.* At the time that this Prospectus is being prepared, various administrative and legislative changes to the federal tax laws are under consideration, but it is not possible at this time to determine whether any of these changes will take place or what the changes might entail.

The foregoing discussion summarizes some of the possible consequences under current federal tax law of an investment in the Funds. It is not a substitute for personal tax advice. Consult your personal tax advisor about the potential tax consequences of an investment in the shares under all applicable tax laws. See "Tax Status" in the SAI for more information.

**Fund Service Providers**

*Commonwealth Fund Services, Inc.* (the “Administrator”) is the Funds’ administrator. The firm is primarily in the business of providing administrative and other services to retail and institutional mutual funds and exchange-traded funds.

*Citi Fund Services Ohio, Inc.* (“Citi”) serves as the Funds’ fund accountant and transfer agent, and it provides certain other services to the Funds not provided by the Administrator. Citi is primarily in the business of providing administrative, fund accounting and transfer agent services to retail and institutional exchange traded funds and mutual funds.

*Citibank, N.A.*, serves as the Funds’ custodian.

*Foreside Fund Services, LLC* (the “Distributor”) serves as the Distributor of Creation Units for the Funds on an agency basis. The Distributor does not maintain a Secondary Market in Shares.

*Practus, LLP* services as legal counsel to the Trust and the Funds.

*Cohen & Company, Ltd.*, serves as the Funds’ independent registered public accounting firm. The independent registered public accounting firm is responsible for auditing the annual financial statements of the Funds.

**Continuous Offering**

The method by which Creation Units of Shares are created and traded may raise certain issues under applicable securities laws. Because new Creation Units of Shares are issued and sold by the Funds on an ongoing basis, a “distribution,” as such term is used in the Securities Act of 1933, as amended (the “Securities Act”), may occur at any point. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the prospectus delivery requirement and liability provisions of the Securities Act.

For example, a broker-dealer firm or its client may be deemed a statutory underwriter if it takes Creation Units after placing an order with the Distributor, breaks them down into constituent Shares and sells the Shares directly to customers or if it chooses to couple the creation of a supply of new Shares with an active selling effort involving solicitation of secondary market demand for Shares. A determination of whether one is an underwriter for purposes of the Securities Act must take into account all the facts and circumstances pertaining to the activities of the broker-dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to a characterization as an underwriter.

Broker-dealer firms should also note that dealers who are not “underwriters” but are effecting transactions in Shares, whether or not participating in the distribution of Shares, are generally required to deliver a prospectus. This is because the prospectus delivery exemption in Section 4(3) of the Securities Act is not available in respect of such transactions as a result of Section 24(d) of the 1940 Act. As a result, broker-dealer firms should note that dealers who are not “underwriters” but are participating in a distribution (as contrasted with engaging in ordinary secondary market transactions) and thus dealing with the Shares that are part of an overallotment within the meaning of Section 4(3) (C) of the Securities Act, will be unable to take advantage of the prospectus delivery exemption provided by Section 4(3) of the Securities Act. For delivery of prospectuses to exchange members, the prospectus delivery mechanism of Rule 153 under the Securities Act is only available with respect to transactions on a national exchange.

Dealers effecting transactions in the Shares, whether or not participating in this distribution, are generally required to deliver a Prospectus. This is in addition to any obligation of dealers to deliver a Prospectus when acting as underwriters.

**Premium/Discount Information**

When available, information regarding how often the Shares of a Fund traded on the Exchange at a price above (i.e. at a premium) or below (i.e. at a discount) the NAV of the Fund will be available at [www.InvestConservative.com](http://www.InvestConservative.com). The website will provide information on the number of days that each Fund trades at a premium or discount during the prior year (and most recent quarter since the end of the prior year), median bid-ask spread, and portfolio holdings information.

**Financial Highlights**

The following table is intended to help you better understand the financial performance of the American Conservative Values ETF since its inception. Certain information reflects financial results for a single share of the American Conservative Values ETF. The total return in the table represents the rate you would have earned (or lost) on an investment in the American Conservative Values ETF, assuming reinvestment of all dividends and distributions. The information has been audited by Cohen & Company, Ltd., the independent registered public accounting firm of the American Conservative Values ETF, whose report, along with the American Conservative Values ETF's financial statements, is included in the ETF's annual report to shareholders. The annual report is available from the American Conservative Values ETF upon request without charge.

Because the American Conservative Values Small-Cap ETF, as of the date of this Prospectus, has not yet commenced operations, no financial highlights are available for this ETF. In the future, its financial highlights will also be presented in this section of the Prospectus.

## AMERICAN CONSERVATIVE VALUES ETFs
